

#### User Story 1

I want to go on a vacation with my friends but it never leaves the group chat. We will often talk about it but it never goes beyond that phase. We have a lot of time conflicts and commitments and it is difficult for us to find a time that works as well as an affordable location we all agree on. As a result, we end up never going on vacation anywhere and the talks never end up leaving the group chat. I wish there was an easier way to plan trips with my friends.

#### User Story 2

I never know what to do when on vacation. My life is busy enough with a job and school and I barely have enough time to figure out the logistics of the vacation (such as where to go and where to stay). Once I am there, I have no idea what to do, and I do not always have time to plan this or to learn more about the vacation destination beforehand. As a result, I end up spending my vacation in and around my hotel since I have no idea where to go, and I often end up regretting not going to a specific place afterwards once I find out it exists after my vacation. I wish there was a way to find out about important landmarks and possible attractions of where I go on vacation.

#### User Story 3

As a user, I want to be able to plan a vacation with my friends on the app. When everything goes right, I can create a new vacation plan, select a destination, set dates, invite friends, and add activities to the itinerary. The app should provide recommendations for accommodations, transportation, and activities. If something goes wrong, I should be able to edit or delete the vacation plan.

#### User Story 4

As a user, I want to be able to split expenses with my friends on the app. When everything goes right, I can add expenses and split them among the group. The app should provide an option to select who paid for the expense and who owes money. If something goes wrong, I should be able to edit or delete the expense and update the split.

(Or this one on the bottom )

As a user, I want to be able to track my budget for the vacation on the app. When everything goes right, I can set a budget for the vacation and track expenses in real-time. The app should provide a breakdown of expenses by category and indicate how much money is left in the budget. If something goes wrong, I should be able to edit or delete expenses and update the budget accordingly.

#### User Story 5

I'm a frequent traveler, and I hate it when the weather doesn't suit my plans. There were times that I arrived at my destination, ready to hit the beach and then it started raining. This happens a

lot especially when I travel to tropical countries. I know that this can be prevented if I do some Google search before the trip. However, checking the weather almost never crosses my mind when I'm in the middle of planning my trip, picking the flights, buying essentials, and scheduling events. Thus, it would be great if I could check the weather forecast for my destination in an easy convenient manner so that I can pack appropriate clothing and plan outdoor activities accordingly.

#### User Story 6

I am a travel lover and I would love to record all my traveling memories by writing notes or pictures, which I can look back to to remember important details or to give recommendations to my friends. I know that I can post this to Facebook or Instagram. However, since I post on those social media pages regularly, it can get lost in my daily posts as time goes by. Therefore, I want to have a page that is dedicated to my traveling posts, and I can also look back at my previous trips to use them as references to plan my new coming trips.
